| Description | | | |
| | The 3-phase and one-stage EMC filters MEF 3/1 are used in the range 0.130 MHz and dampen interferences found in cables | | |
| | from the mains, supply units and control systems. They are suitable for TN-C- and IT mains. The best results are obtained with | | |
| | short connection cables (suggestion: earth connection < 10 cm) of the largest possible cross-section. The EMC filters are | | |
| | bi-directional. They reduce symmetrical and asymmetrical interferences that regularly appear with electronically controlled | | |
| | three phase units through mains influences. | | |
